DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 6-12, 16-17, 20-24, 28-32, 38-40 drawn to a vehicle (drive shaft through bearing), classified in class 180, subclass 376.
 - II. Claims 13, 15 drawn to a vehicle (articulated vehicle with locking mechanism), classified in class 280, subclass 474.
 - III. Claim 35, drawn to a vehicle (articulated vehicle with rear driven wheels), classified in class 180, subclass 14.1.
 - IV. Claims 36-37, drawn to a vehicle (four wheel steered), classified in class 180, subclass 408.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I-IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions as claimed are not disclosed as being capable of use together and they have different modes of operation. As claimed, each is a separate first and second sub-frame and are not disclosed as being used with another first and second sub-frame).

Art Unit: 3611

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
